delivery time is 5 weeks for Antique Brass,
6 weeks for Galvanised Antique Copper.

Antique Brass (see page 193 for more details)

Cast iron is a classic favourite, loved for its traditional qualities and style. Part of the charm of cast iron is the inherent imperfections and idiosyncrasies in the metal produced by the traditional production methods. Newly cast product retains the texture and individuality of radiators cast over 100 years ago but in order to create an aged appearance to the finish they go through a number of stages ending with a hand finished application. The appeal of an antique product is its unique patina developed over time, each radiator will differ and so to reproduce that effect our Antique finishes will have a varying depth of light and dark across the radiator. After cleaning, priming and the application of the brass effect powder coat each radiator has an antique rub applied by hand. This is then rubbed down and baked to fix the protective surface. The level and amount of light and dark differs from section to section as the combination of texture, casting marks and the random nature of hand finishing produces a striking and unique antiqued finish.

*Saving based on the value of individual items when bought separately. Order any of our selected valves & matching pipe covers at the same time as your radiator.
